EDUCATION

University of Illinois Urbana-Champaign

B.S. in Systems Engineering and Design

Champaign, IL

Aug. 2024 – May 2028

Track Option: Robotics and Automated Systems | Minor: Computer Science

Relevant Coursework: Discrete Structures, Engineering Design, Optimization Models, Business Side of Engineering

Cumulative GPA: 3.5/4.0

EXPERIENCE

EDRA Labs

Artificial Intelligence Research Intern

June 2026 – July 2026

- Built and trained a Gemma 3.0-powered AI chatbot using RLHF, iterating on its ability to interpret social cues and produce natural, coherent conversational responses.
- Programmed an automated SEO workflow for the chatbot, reaching 250 users within 4 days of launch, and added guardrails to control cost while maintaining output quality.
- Benchmarked AI models across output quality, cost, latency, and scalability, translating results into model-selection recommendations for company projects.

Mondelez International

Research and Development Intern

January 2026 – May 2026

- Developed a new product aimed at the 18–24 age segment to expand market reach.
- Theorized, built, tested, and presented the product to stakeholders at regional headquarters in New Jersey within 6 months, 3x the speed of the traditional 18-month production cycle.
- Collaborated with senior team members to build an AI pipeline driving a shift from iterative to calculated production processes, improving creation timelines by 50%.

Second Chance Innovations

Founding Engineer

August 2024 – December 2025

- Designed the capstan housing, lace-closure, and upper-arm brace for a post-stroke elbow-extension device that restores range of motion, co-engineering the system for comfort and usability.
- Secured university and iVenture funding; reworked the prototype with patient and expert feedback, improving range of motion by 20% and producing a DFM-ready design.

PROJECTS

Human Computer Interaction Research

Research Assistant

January 2026 – Present

- Engineered a voice-activated virtual assistant integrating Bluetooth-paired Meta glasses to capture, process, and analyze users' environments in real time.
- Applied the system's outputs to improve user decision-making speed and reduce cognitive load by 15 points on the NASA-TLX scale.

InvestTech.AI

Co-Founder

June 2025 – Present

- Developed an investment tool that pulls, processes, and organizes financial, news, social, and industry data, improving research efficiency by 600%.
- Developed a secondary post-processing model that ranks insights by importance and generates 12-month projections with supporting calculations.

SKILLS & CERTIFICATIONS

Languages: English (Native), Hindi (Native), Spanish (Intermediate), Telugu (Beginner)

Skills: Python | C++ | ML | Automation | Prompt Engineering | Fusion 360 | SEO | MATLAB | Leadership

Certifications: 6 Sigma Green Belt | Phi Eta Sigma National Honor Society | IBDP
