EDUCATION

University of Illinois Urbana-Champaign

B.S. in Systems Engineering and Design

Champaign, IL

Aug. 2024 – May 2028

Track Option: Robotics and Automated Systems | Minor: Computer Science

Relevant Coursework: Discrete Structures, Engineering Design, Optimization Models, Business Side of Engineering

Cumulative GPA: 3.5/4.0

EXPERIENCE

EDRA Labs

Artificial Intelligence Research Intern

June 2026 – July 2026

- Trained a Gemma 3.0 powered AI chatbot using RLHF on conversations testing its ability to pick up social cues and accurately portray textual conversing ability.
- Programmed a workflow to automate SEO for the chatbot, resulting in 250 users within 4 days of launch. Set up guardrails to minimize cost and maximize output via iterative filtering.
- Benchmarked AI models across output quality, token cost, training cost, latency, and scalability; translated results into model selection recommendations for company projects.

Mondelez International

Research and Development Intern

January 2026 – May 2026

- Developed a new product with an aim to improve market reach in the 18–24 age segment.
- Successfully theorized, created, tested, and pitched the product at regional headquarters in New Jersey within a 6-month time period, 3x the speed of the traditional 18-month production cycle.
- Built an AI pipeline in collaboration with Mondelez seniors to drive a shift from iterative production processes to calculated production, improving creation timelines by 50%.

Second Chance Innovations

Founding Engineer

August 2024 – December 2025

- Designed the capstan housing, lace-closure, and upper-arm brace for a post-stroke elbow-extension device that restores range of motion, co-engineering the system for comfort and usability.
- Secured university and iVenture funding; reworked the prototype with patient and expert feedback, improving range of motion by 20% and producing a DFM-ready design.

PROJECTS

Human Computer Interaction Research

Research Assistant

January 2026 – Present

- Built a voice-activated virtual assistant that pairs via Bluetooth with Meta glasses to observe and analyze users' environments and derive information from their surroundings.
- Leveraged the technology to improve user decision-making speed and reduce cognitive load by 15 points on the NASA-TLX scale.

InvestTech.AI

Co-Founder

June 2025 – Present

- Developed an investment tool to pull, process, and sort financials, news, social data, and industry data, improving research efficiency by 600%.
- Developed a secondary post-processing model that ranks insights by importance and generates 12-month projections with supporting calculations.

SKILLS & CERTIFICATIONS

Languages: English (Native), Hindi (Native), Spanish (Intermediate), Telugu (Beginner)

Skills: Fusion 360 | SEO | MATLAB | Prompt Engineering | Leadership | Python | C++ | ML | Automation

Certifications: 6 Sigma Green Belt | Phi Eta Sigma National Honor Society | IBDP
